

Arun Kumar

L2 Application Support Engineer | Production Support | Banking Applications
Email: kumararun3052006@gmail.com | Phone: +91-7505566405 | Location: Gurgaon, India

Professional Summary

L2 Application Support Engineer with nearly 2 years of experience in Unix/Linux, Python, Shell Scripting, and SQL within the banking domain. Experienced in providing production support for business-critical applications, including incident management, SLA adherence, root cause analysis (RCA), and problem management. Skilled in handling P1/P2 incidents, application and batch monitoring, and stakeholder communication to ensure high system availability. Strong hands-on experience in Python and Shell scripting to automate operational tasks, reducing manual effort and improving efficiency. Proficient in writing complex SQL queries for data validation, troubleshooting, and basic data analysis. Experienced with IBM CMOD, release management, and ITIL-based support processes. Actively seeking opportunities in L2 Application Support, Production Support, Python Automation, or Data/SQL-focused roles.

Technical Skills

- Programming: Python, Shell Scripting (Bash, AWK)
- Database: SQL, MySQL
- Operating Systems: Unix, Linux
- Tools: ServiceNow, JIRA, IBM CMOD, Git
- Monitoring: Batch Monitoring, Application Monitoring
